

Improved airflow and breathability with a luxurious, classic memory foam feel

Overview

FXI Aerus® foams have always delivered exceptional performance. The new and improved Aerus® Plus chemical formulation further enhances the open cell structure to deliver improved breathability plus excellent comfort, pressure relief and durability. Aerus® Plus foam is also CertiPUR-US® certified, meaning it is made without formaldehyde, phthalates, mercury, ozone depleters, and provides low VOC emissions for indoor air quality. Its superior properties are largely a result of the VPF™ manufacturing technology, which ensures consistent high quality and environmentally friendly foam.

Benefits

- Enhanced open cell structure for a more breathable, comfortable sleep surface
- Exceptional pressure relief
- Moisture and heat dissipation for better temperature management
- Scientifically tested for long-lasting durability and comfort
- Environmentally friendly VPF™ technology
- CertiPUR-US® certified

Breathability

The superior properties of FXI specialty bedding foams are largely a result of the patented VPF™ manufacturing technology, or Variable Pressure Foaming. This proprietary process uses an enclosed chamber to maintain constant atmospheric conditions, delivering a consistently high quality, perfectly formed product with every run. In addition to producing best in class foam, VPF protects our environment with virtually zero emissions, completely eliminating CFCs and other blowing agents that can be harmful.

About FXI

FXI is a leading producer of foam innovation in the Bedding, Furniture, Industrial, Home & Office, Healthcare and Transportation Markets. Our focus is on finding tailored solutions for our customers that are driven by consumer insights and industry trends. Our products include finished goods, sub-assemblies, services and raw materials for OEMs, fabricators and retailers. You will find FXI's foam innovations inside, around and under yourself in countless applications. We protect automobile passengers on the highway, help consumers sleep sounder and furniture manufacturers create comfort. We provide for sharper images in digital printers and help consumers keep their homes clean. We provide critical components for filters, gaskets and seals in everything from blood oxygenators to computer disk drives. Everywhere foam goes; FXI's innovations lead the way.
